❧ ERP SYSTEM OF AZAM CAMPUS ❧

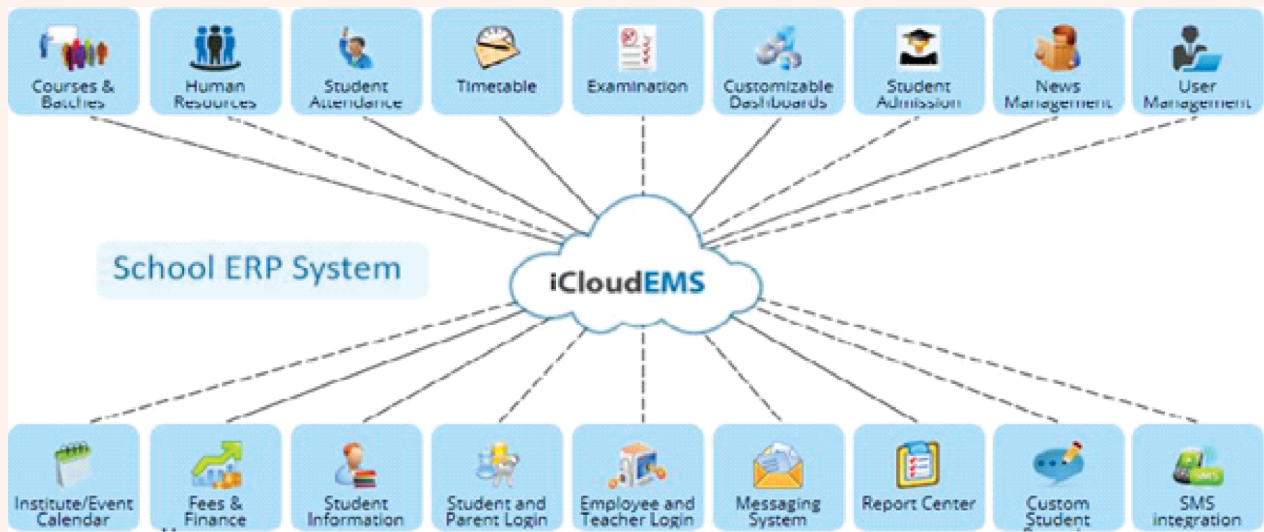

Enterprise Resource Planning (ERP) System

ERP for Educational Institutes plays an important role in managing processes like fees management, financial accounting, Library management, exams management, admission management, etc in educational institutions.

ERP for Educational Institutes is designed to flow the information between each stock holder such as students, staff, parents, alumni, management etc. This can be beneficial to increase transparency of institutional policies & student mobility and faster processing of documents. ERP software creates ease in the time & efficiency factor which is very important for the educational institutions.

Benefits of ERP for Educational Institutes :

- ▶ Automated Admissions process: which consumes lesser time and applying online from service portal makes application process simpler for all the students and the parents.
- ▶ It helps in cost efficiency by managing the admission process, fees collection and Documents.
- ▶ It also provides security for the data.
- ▶ It also provides the backup system to preserve the information from time to time.
- ▶ It also allows students to access the portal to pay for the courses and register for the new semesters. It manages records for each student, any department, staff or faculty on campus can find the information of student whenever they need.

Considering the benefits of ERP system, MCE Society has decided to install and use ERP system in all its institution. Work has been done in most of our schools and colleges rest will be covered soon.

❧ GREEN CAMPUS PROJECT ❧

Implemented Throughout the of Azam Campus

This initiative includes the development of our entire 24 acre campus into a model of complete sustainability and a zone of ecological balance. We plan to achieve this by implementing the principles of sustainability on primarily three fronts, these being – water, energy and solid waste. The better management of these three elements is a great start towards setting an example for the rest of the world that ecological preservation and development can go hand in hand and are not mutually exclusive. We have achieved this on all three fronts by the implementation of various sustainable technologies such as Rainwater Harvesting, Solar Power Generation, Organic Waste conversion, LED lighting etc. The ecological balance is achieved by the development of an outdoor area of the campus through which a fresh water canal flows into a zone meant especially for environmental studies and its implementation at all levels, right from school to post graduate and doctoral studies. This aspect also includes the implantation of artificial nesting all throughout the campus to foster the lost habitat for birds in our area. This is being carried out in the name of C.E.S.S. The details of these initiatives are given below :

1. Rainwater Harvesting
2. Solid Waste Management
3. Solar Power Panel (PV Panel) Installation
4. LED Conversion
